Colonialism helped to introduce English to regions like India and parts of Africa, where it continues to be widely spoken. Although Hindi is the most widely-spoken language in India today, English remains an official language in the country and is often used in university education, jobs and within the field of politics.

English language has approximately 400 million native speakers worldwide. It is also the single most popular second language. Thus, when native English speakers are combined, it is recognized as the single-most widely spoken global language.
